Title

IBM DATA ANALYST CAPSTONE PROJECT

Stack Overflow Developer Survey Analysis

Eviatar Becerra

October 15, 2026

Outline

Presentation Outline

-Introduction

Introduce the purpose of this project

- Current Technology Usage

Popular programming languages, databases, platforms, and web frameworks

-Future Technology Trends

Technologies developers want to work with

-Developer Demographics

Respondent distribution by country, age, and education

Executive summary

Executive Summary

-The key findings of the project show the Top languages being used around the world and categorizing them by a few demographics after they have been separated by popularity.

Introduction

Introduction

The Purpose of the report is to show general direction for the future of the technology industry for the both anyone who decides for it to be there career path. The value of the analysis comes with recognizing what trajectory this industry will take and putting forth ones best efforts to get ahead of the curve.

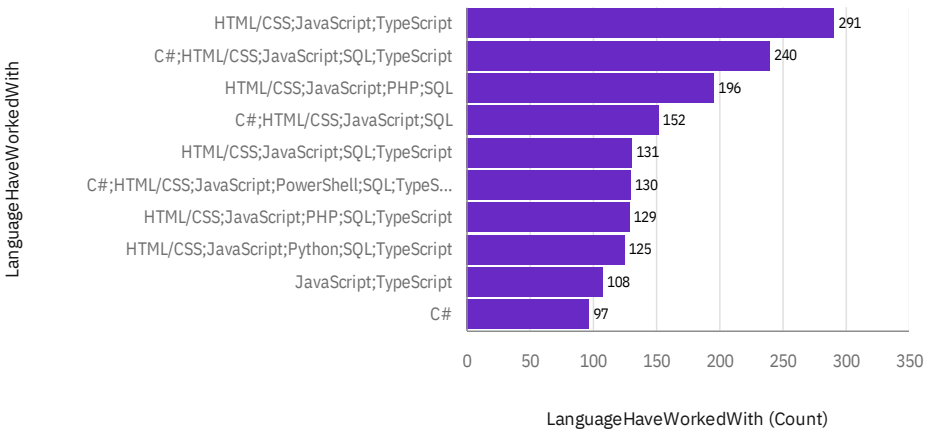

Methodology

Methodology

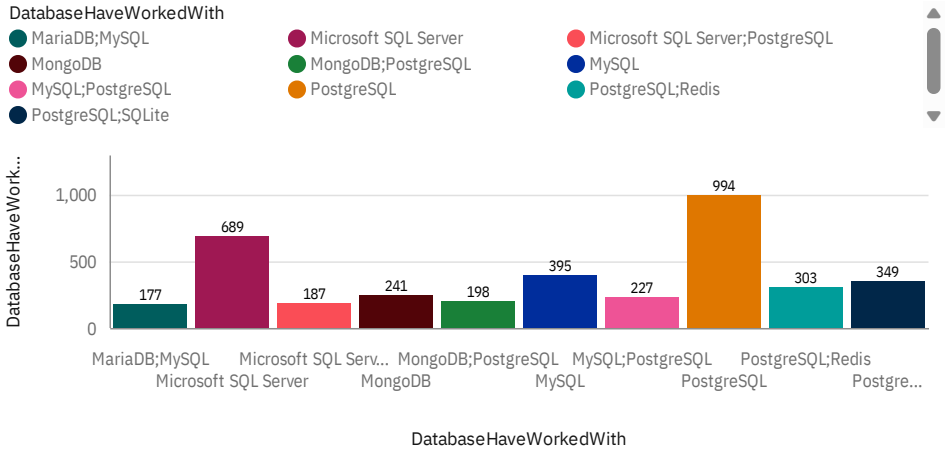

The sources of the data come from the coursera website, and are being wrangled by a prodigy of a student behind the keyboard in ways that show the trajectory of tools being used and databases that the public are more inclined to use.

Current Technology Usage

Top 10 Programming Languages Used

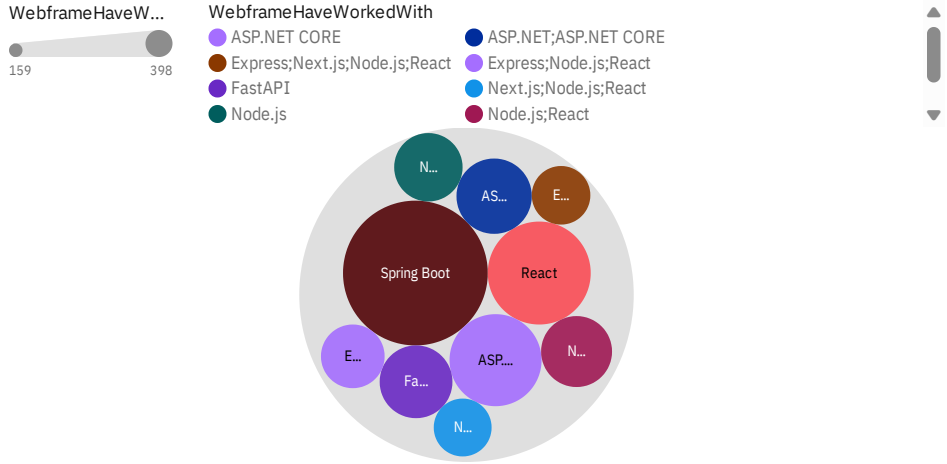

Top 10 Worked with Databases

Top 10 Platforms Used

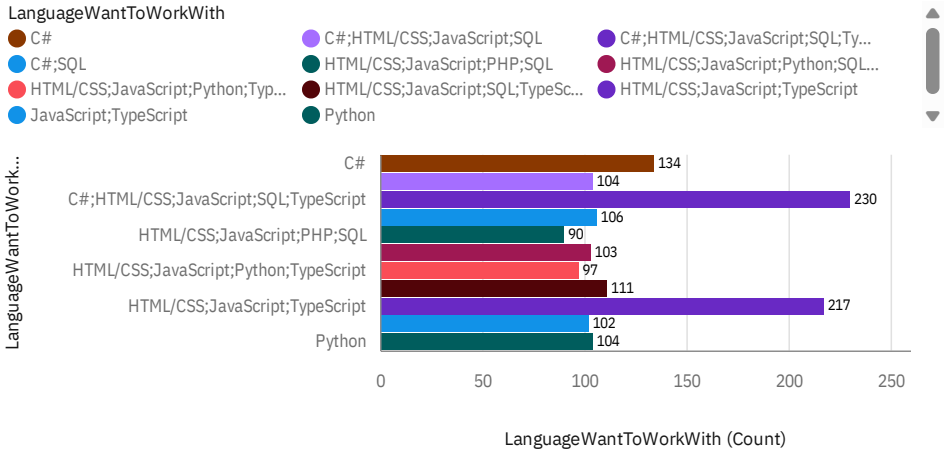

WTop 10 Web Frames Used

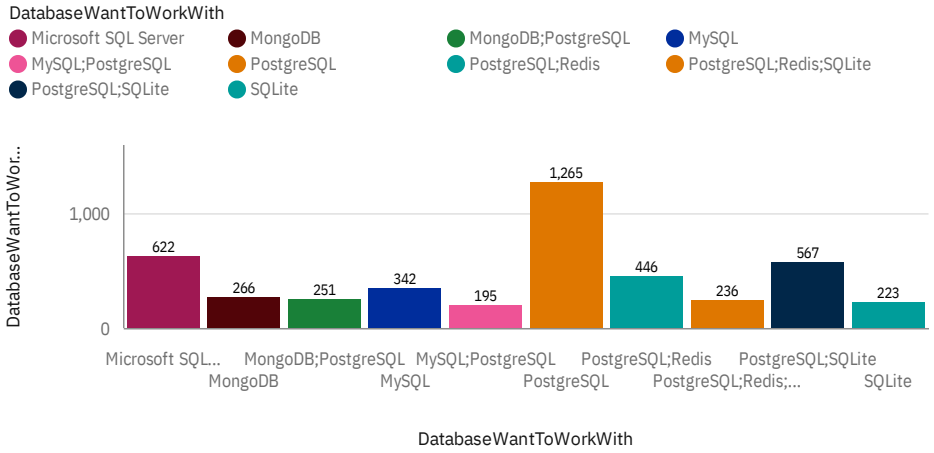

Future Technology Trend

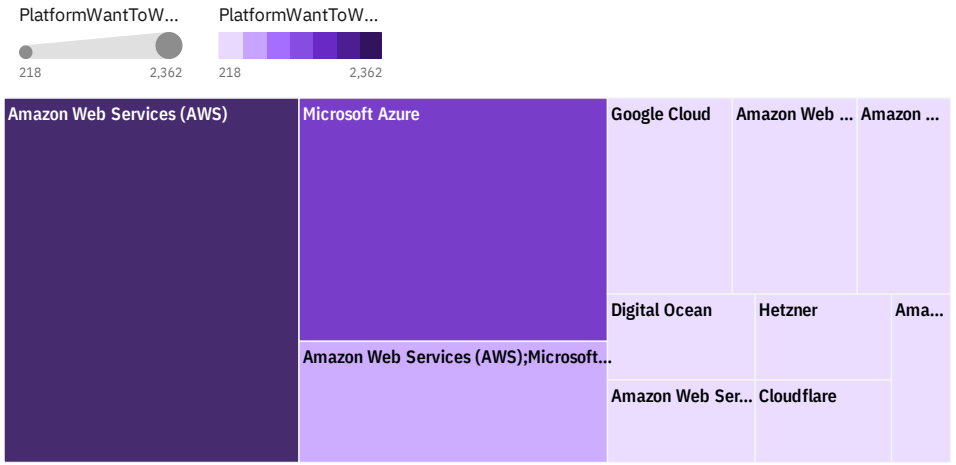

Top 10 Languages Developers Want to Use

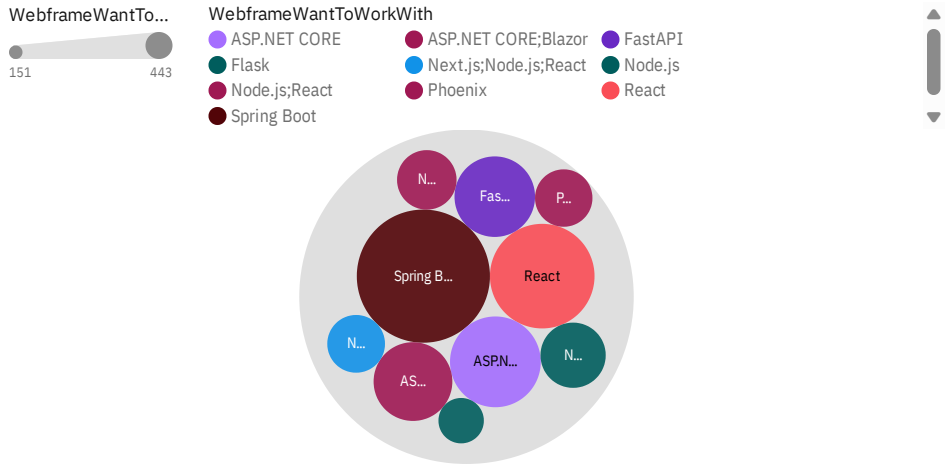

Top 10 Databases Developers Want to Use

Top 10 Platforms Developers Want to Use

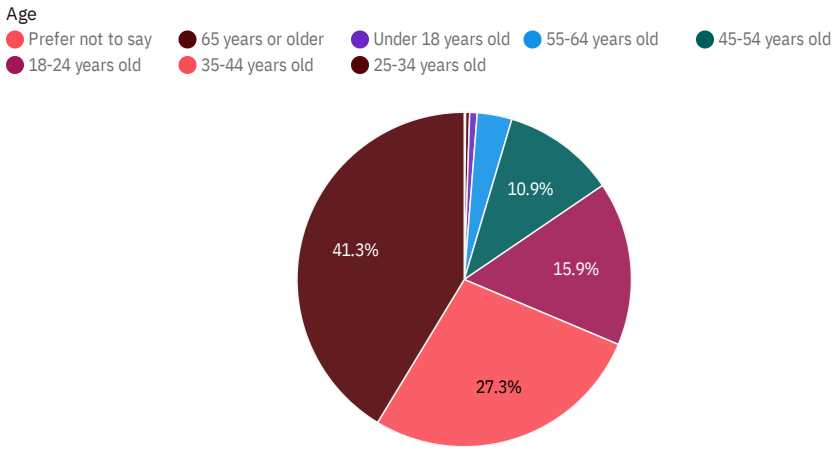

Top 10 Web frames Developers Want to Use

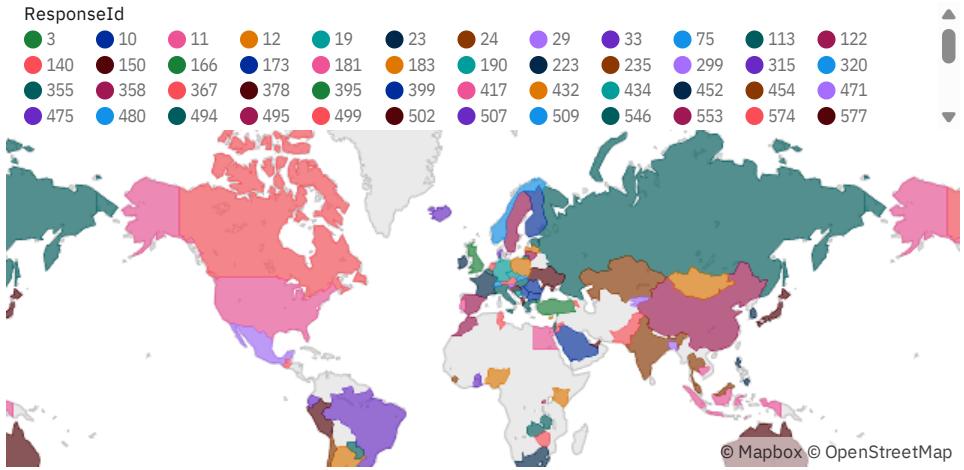

Demographics

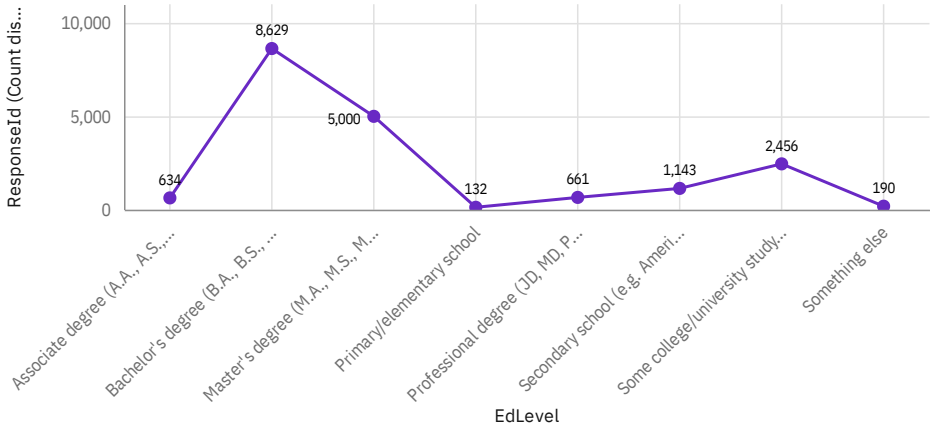

Respondent Distribution by Age

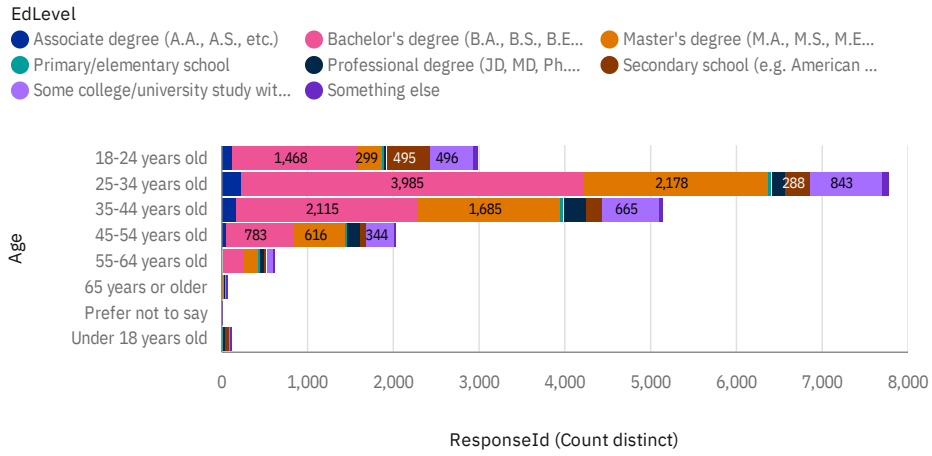

Respondent Count by Country

Respondent Distribution by Education Lvl

Respondent Count by Age, Classified by Ed Lvl

Dashboard insigth

Dashboard Insights

From the graphs in the project insights can derived in multiple ways showing the trajectory of the future for technology. Languages that are widely used are easier to interpret and the ones that take time to understand are used by a more capable group that can undergo a whole other level of research.

Discussion

Discussion

The demographics slide shows us what groups are using certain levels of tech and that most are being used by people that have obtained there bachelors degree. This range can be easily explained for there is a wide variety of people who have reached his feat and those who do can most likely understand how to use the tech therefor making it the most abundant region. Languages and platforms developers want to use are easily known for being the best pathway for them to move forward in the industry and create large steps in innovation.

Overall findings

Overall Findings

We have found the demographic that uses everything from languages to platforms. Understanding the direction of this industry will help further with understanding why certain tools are being used as innovators usually lead the pack and are followed by most.

Conclusion

Conclusion

In conclusion we can say that technology has taken a massive step forward in the years and these graphs can be interpreted well. The findings made will carve a pathway for the future in understanding what demographics are using which languages and why. Including what technologies they want to work with that they may not be able to use yet due to there understanding. Trending tech tends to be the what most people can understand and use for there personal or non-personal gain and further better the world in whichever way they see fit.
